PROFESSIONAL SUMMARY

Registered Civil Engineer and Registered Master Plumber specializing in quantity takeoffs and cost estimating for infrastructure and building works. Prepared Australian irrigation, US residential framing, and apartment HVAC takeoffs using PlanSwift and Excel. At the National Irrigation Administration, developed BOQs, DUPAs, and Program of Work inputs for tunnel, retaining wall, road, drainage, and canal packages while verifying site quantities and payment claims. Combines drawing interpretation with site supervision and QA/QC experience.

CORE COMPETENCIES

Quantity Takeoff | Cost Estimating | BOQ and DUPA | Irrigation Systems | Residential Framing | HVAC Takeoff | Program of Work | Variation Orders | Drawing Review | QA/QC

PROFESSIONAL EXPERIENCE

Freelance Estimator **July 2026 - Present**

Independent | Remote estimating for Australian and US projects

- Measured Australian irrigation pipework, drip lines, valves, fittings, and control components from plans, then organized the quantities in Excel and flagged scale discrepancies for clarification before finalizing the takeoff.
- Quantified studs, plates, joists, trusses, sheathing, blocking, and related materials for US residential wall, floor, and roof framing in PlanSwift, producing organized Excel takeoff schedules for estimator review.
- Marked up apartment HVAC plans and counted FCUs, ductwork, grilles, dampers, exhaust fans, and fittings, documenting assumptions and drawing conflicts so the quantities could be checked before submission.

Engineer A **May 2025 - Sept 2026**

National Irrigation Administration, Tumauini, Isabela

Tumauini River Multipurpose Project - Tumauini, Isabela

- Converted diversion tunnel and afterbay retaining wall drawings into quantity takeoffs and cost estimates, providing BOQ and Program of Work inputs for planning and budget review.
- Coordinated construction of two steel lookout towers as Project-in-Charge, verifying site progress, punch list items, quantities, and billing records through project completion.
- Re-measured variation order items against field conditions and documented revised quantities for scope adjustment and payment evaluation.
- Revised Programs of Work, BOQs, DUPAs, cross-sections, and plans for roads, drainage, canal structures, crossings, and slope protection, supplying technical attachments for cost and design reviews.
- Validated field conditions and maintained inspection, monitoring, and environmental records, giving project and regulatory teams traceable documentation for review.

Site Engineer **Oct 2024 - Feb 2025**

SMT Construction, City of Ilagan, Isabela

Renovation of Social Service and Admitting Office - Cagayan Valley Medical Center

- Coordinated subcontractors and sequenced demolition and renovation work across architectural, civil, electrical, mechanical, and auxiliary scopes to keep site activities aligned with the approved plans.
- Inspected materials and completed installations against plans and specifications, then quantified scope changes with the CVMC Infrastructure Department for variation order evaluation.
- Updated as-built plans to reflect completed renovation work, providing a final record for project review and audit.

PROFESSIONAL EXPERIENCE

QA/QC Engineer **Apr 2024 - Sept 2024**

Specialized Products and Services Inc., Quezon City, Manila

Eagle Cement Plant Shutdown - San Ildefonso, Bulacan

- Directed refractory demolition and inspected replacement works against client specifications, documenting findings for correction with site supervisors.

PASAR Acid Plant Shutdown - Isabel, Leyte

- Inspected insulation, cladding, and acid-resistant brick installations with EEI and PASAR QA/QC teams, compiling quality records to support work acceptance.

THPAL Plant Shutdown - Claver, Surigao del Norte

- Supervised refractory and scaffolding activities and recorded daily inspection results, providing evidence of conformance with specifications and safety requirements.

EDUCATION

Master of Science in Civil Engineering (In Progress) **Feb 2025 - Present**

Cagayan State University, Carig Campus | Construction Engineering and Management

Bachelor of Science in Civil Engineering **Aug 2019 - July 2023**

Cagayan State University, Carig Campus | Construction Engineering and Management

ADDITIONAL TRAINING

- 40-Hour Basic Training Course for a Pollution Control Officer - Environmentors Training & Consultancy — Oct 2025
- International TVET Conference: Global Landscape - Cagayan State University and Colombo Plan Staff College — Oct 2025
- PlanSwift and Primavera Workshop - MST Connect — Nov 2024
- Construction Productivity Rate Estimation Workshop - MST Connect — Oct 2024
- Manual Construction Building Estimates with Excel and AutoCAD - MST Connect — Oct 2024
- Training for Safety Officer 2 - PROPHETS Management Consultancy Services — Sept 2022
- How to Read and Interpret Construction Drawings and Specifications - MST Connect — Mar 2022

TECHNICAL SKILLS

PlanSwift | AutoCAD | Microsoft Excel | Microsoft Word | Primavera P6 | Quantity Takeoff | Direct Unit Price Analysis | Construction Documentation | Technical Reporting
