PROFESSIONAL SUMMARY

Registered Civil Engineer and Registered Master Plumber with 2+ years of experience delivering quantity takeoffs, detailed cost estimates, BOQs, DUPAs, planning documents, and QA/QC support across government infrastructure, building renovation, and industrial plant shutdown projects. Prepared cost and quantity documentation for dam, tunnel, retaining-wall, access-road, canal, and slope-protection works and managed project controls for a PHP 2.84 million steel lookout-tower contract. Combines field experience with AutoCAD, Excel, PlanSwift, Primavera P6, and disciplined technical reporting.

CORE COMPETENCIES

Detailed Cost Estimating | Quantity Takeoff | BOQ and DUPA | Unit Cost Derivation | Program of Work Preparation | AutoCAD Drafting | Variation Orders | Project Monitoring | QA/QC

PROFESSIONAL EXPERIENCE

Engineer A May 2025 - Sept 2026

National Irrigation Administration, Tumauni, Isabela

Tumauni River Multipurpose Project – Tumauni, Isabela

- Prepared detailed quantity takeoffs and cost estimates for the proposed TRMP high-dam diversion tunnel and afterbay retaining wall, converting design drawings into BOQ and Program of Work inputs for planning and budget review.
- Managed the PHP 2.84 million construction of two steel lookout towers as Project-in-Charge, coordinating inspections, progress records, punch listing, and quantity and billing verification through project completion.
- Re-quantified variation-order items and verified field measurements, producing documented quantities for scope adjustment and payment evaluation.
- Prepared and revised Programs of Work, BOQs, DUPAs, plans, cross-sections, and technical attachments for access roads, drainage, canal structures, crossings, and slope-protection works.
- Conducted infrastructure inventory and field validation and prepared reports, minutes, and monitoring records, giving project and regional teams traceable documentation for review.
- Maintained Pollution Control Officer documentation for ECC monitoring, environmental reports, permits, and EMB Region II coordination, supporting regulatory reporting requirements.

Site Engineer Oct 2024 - Feb 2025

SMT Construction, City of Ilagan, Isabela

Renovation of Social Service and Admitting Office, Cagayan Valley Medical Center – Tuguegarao City, Cagayan

- Supervised demolition and multidisciplinary renovation works covering architectural, civil, electrical, mechanical, and auxiliary scopes, coordinating subcontractors and work sequencing to maintain schedule and safety compliance.
- Inspected construction materials and installations against approved plans and specifications, documenting site conditions and supporting compliant work acceptance.
- Prepared and reviewed variation-order quantities and estimates with the CVMC Infrastructure Department, aligning scope changes with project budget evaluation.
- Produced final as-built plans reflecting completed renovation works, providing audit-ready documentation for Commission on Audit review.

QA/QC Engineer Apr 2024 - Sept 2024

Specialized Products and Services Inc., Quezon City, Manila

Eagle Cement Plant Shutdown Project – Eagle Cement Plant, San Ildefonso, Bulacan

- Directed refractory demolition and QA/QC inspection for replacement works, verifying safe material removal and conformity of new installations with client specifications.
- Coordinated inspections with site supervisors and documented findings, enabling timely correction and traceable quality control throughout the shutdown.

PASAR Acid Plant Shutdown Project – Philippine Associated Smelting and Refining Corporation (PASAR), Isabel, Leyte

- Coordinated with EEI and PASAR QA/QC teams and managed inspection of insulation and cladding on ducting and heat-exchanger equipment, supporting on-schedule completion to project quality standards.
- Inspected acid-resistant brick installation for the Acid Plant Towers and prepared audit and quality records, documenting compliance with technical and safety requirements.

THPAL Plant Shutdown Project – Taganito HPAL Nickel Corporation, Claver, Surigao del Norte

- Supervised refractory demolition, installation, and scaffolding activities, maintaining compliance with approved specifications, quality controls, and safety requirements.
- Compiled and reviewed daily inspection reports and QA/QC records, providing project management with current evidence of work status and conformity.

EDUCATION

Master of Science in Civil Engineering (In Progress) Major in Construction Engineering and Management Cagayan State University, Carig Campus	Feb 2025 – Present
Bachelor of Science in Civil Engineering Major in Construction Engineering and Management Cagayan State University, Carig Campus	Aug 2019 – July 2023

ADDITIONAL TRAINING

• 40-Hour Basic Training Course for a Pollution Control Officer - Environmentors Training & Consultancy	Oct 24-30, 2025
• 2025 International TVET Conference: Global Landscape - Aligning TVET and Industry for Sustainable Development - Cagayan State University and Colombo Plan Staff College	Oct 30-31, 2025
• Planswift & Primavera Workshop: Learn Project Estimation & Scheduling, Quantity Surveying, Construction Drawings, and Rate Analysis to Enhance your Construction Projects – MST Connect	Nov 8 – 9, 2024
• Construction Productivity Rate Estimation Workshop: Utilizing Direct Unit Price Analysis Rate for Productivity Estimation – MST Connect	Oct 24, 2024
• Manual Construction Building Estimates: with aid of Microsoft Excel and AutoCAD – MST Connect	Oct 14 – 18, 2024
• Training for Safety Officer 2 - Occupational Safety and Health Training – PROPHETS Management Consultancy Services	Sept 22 – 26, 2022
• 2-Hour Training in How to Read and Interpret Construction Drawings & Specifications – MST Connect	Mar 1, 2022
